WORLDWARE DEVELOPS NEW DEGREASER FORMULA - EATOILS™ BT200™ OUTPERFORMS ALL OTHERS

Cambridge, ON, Canada – March 15, 2007.

WorldWare Enterprises Ltd. is pleased to announce the introduction of a revolutionary new product - EATOILS™ BT200™ Degreaser. Over the past few years, the company has established a reputation in the industry for providing environmentally friendly cleaning products that outperform traditional cleaning products for some of the toughest cleaning jobs.

The company has developed this new EATOILS™ BT200™ formula to provide its clients with the best degreasing product for such tough jobs as: 1) removing oil and grease stains from concrete and asphalt, 2) deep cleaning factory floors to remove fork lift tire marks and other stains, 3) degreasing equipment, 4) removing oils & other hydrocarbons from soil, trench drains, etc., and 5) removing scuff marks from wood floors without harming the finish.

EATOILS™ BT200™ is so good at its job that its introduction will mean that the company's flagship product, BT100™, will be phased out of production. BT100™ is the industry's choice for these jobs now, but BT200™ will provide the added benefits of a more potent formula, the highest microbial count in the industry, and a wider applicable temperature range.

All of the company's EATOILS™ products are GREEN PRODUCTS and they are certifiable under the ECOLOGO™ program – they contain no harsh chemicals, are completely safe to use, environmentally friendly, VOC free, solvent free, NPE free, and yet they outperform traditional cleaning and treatment products.

Using naturally occurring microbes and enzymes WorldWare Enterprises Ltd. has found ways to use ***Mother Nature's own little workers*** to solve some of the toughest cleaning and treatment problems faced by facility managers and home owners alike. WorldWare has developed EATOILS™ products to safely handle everything from washroom & facility cleaning & degreasing, to carpet & upholstery cleaning, to drain & grease trap treatment, to septic treatment, to cleaning up oil spills & industrial brownfield remediation (including soil & waste water treatment), to agricultural livestock pen cleaning and manure treatment. As all the EATOILS™ products are completely safe to use, they are equally effective in industrial, commercial, and household situations. All EATOILS™ products are available in a number of convenient sizes to meet the customer's needs.

WorldWare Enterprises Ltd. continually redefines commercial, industrial and home cleaning with effective, green, and cost-efficient products.
