## WORLDWARE AWARDED ECOLOGO CERTIFICATION FOR EATOILS™ PRODUCTS

Cambridge, ON, Canada – October 16, 2007.

Together with Environment Canada and Terrachoice Environmental Marketing Inc., WorldWare Enterprises Ltd. is pleased to announce that its EATOILS™ brand of environmentally friendly, Green Cleaning Products has completed the process of licensing and certifying individual products under the ECOLOGO™ Program.

The products certified under the ECOLOGO™ program include all of the EATOILS™ products for industrial, janitorial, and household use - products for 'Cleaning and Degreasing', 'Odor Control', 'Septic Treatment', and 'Drain & Grease Trap Maintenance.' Under the 'CCD 110 - Cleaning & Degreasing' category five products have been certified – EATOILS™ BT200™, SUPER DEGREASER™, BIOBLAST™, BIOBLAST 10X FF™, and SUPER SAFE-STEP™. Under the 'CCD 115 - Odor Control' category three products have been certified – EATOILS™ SUPERFRESH™, SUPERFFRESH 10X FF™, and SUPER CARPET-FRESH™. Under the 'CCD 116 Septic Treatment' category two products have been certified – EATOILS™ SUPER SRV™ and ENZYME DIGESTER™. Under the 'CCD 113 Drain & Grease Trap Maintenance' category three products have been certified – EATOILS™ SUPERSEP™, SUPERFLOW™, and SUPER GREASE EATER™. All EATOILS™ products are available in a number of convenient sizes to meet the customer's needs.

All EATOILS™ products are GREEN PRODUCTS, certifiable under the ECOLOGO™ program – they contain no harsh chemicals, are completely safe to use, environmentally friendly, VOC free, solvent free, NPE free, and yet they outperform traditional cleaning and treatment products.

Using naturally occurring microbes WorldWare Enterprises Ltd. has found ways to use ***Mother Nature's own little workers*** to solve some of the toughest cleaning and treatment problems faced by facility managers and home owners alike. WorldWare has developed EATOILS™ products to safely handle everything from washroom & facility cleaning & degreasing, to carpet & upholstery cleaning, to drain & grease trap treatment, to septic treatment, to cleaning up oil spills & industrial brownfield remediation (including soil & waste water treatment), to agricultural livestock pen cleaning and manure treatment. As all the EATOILS™ products are completely safe to use, they are equally effective in industrial, commercial, and household situations.

There are plans to add more EATOILS™ products to the ECOLOGO™ program in the future, however, there just aren't enough categories presently available in the program to encompass all of the products in the line.

WorldWare continually redefines commercial, industrial and home cleaning with effective, green, and cost-efficient products.
